

Data

- Augmentations Applied
- Random Flip
- Random Rotation
- Normalization of the data

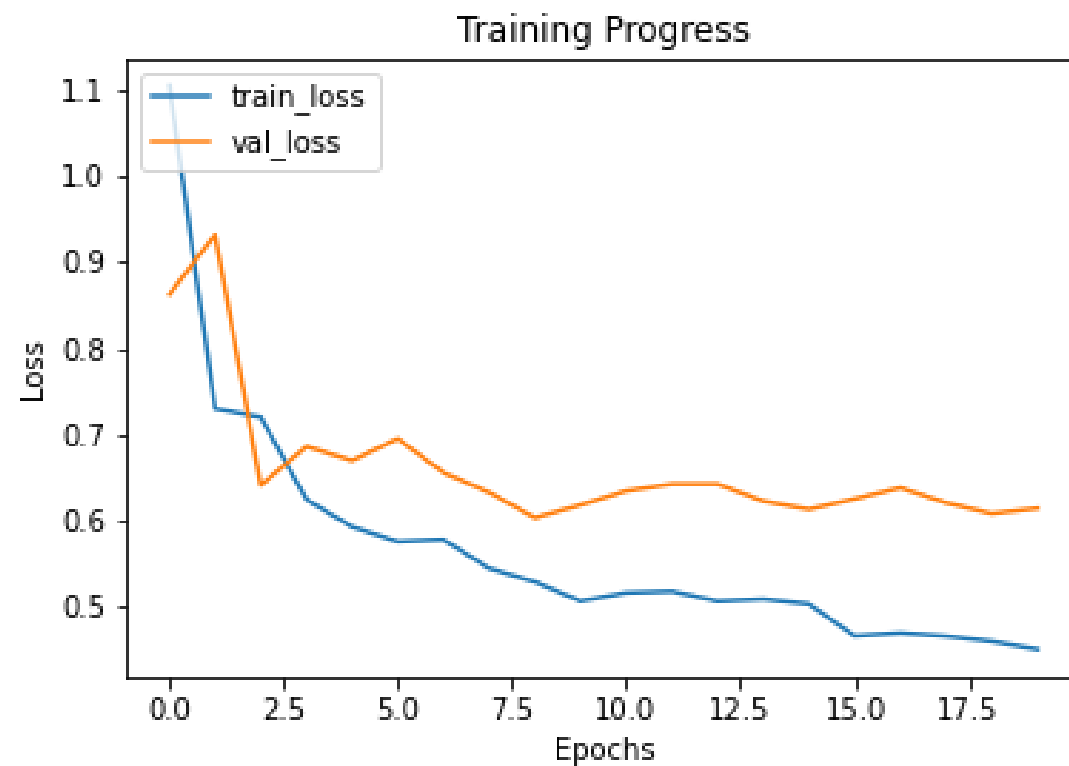

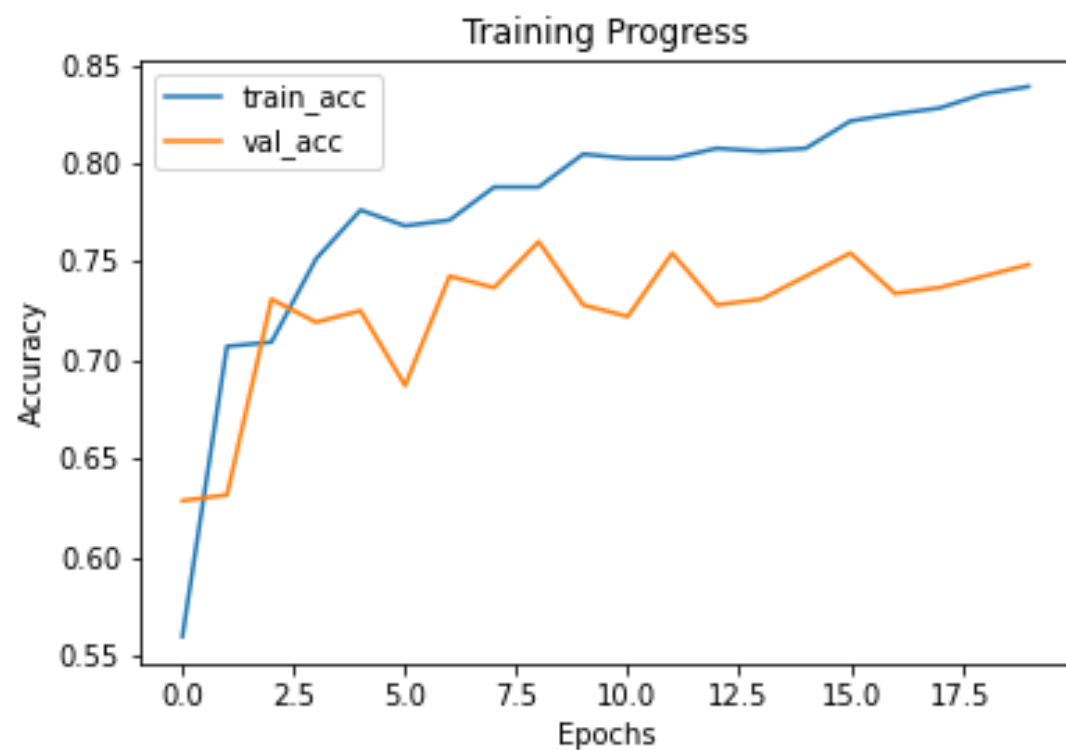

BiT Model

- A ResNet50 was used as a backbone for the model.
- A final dense layer was added to do final training (fine tuning)
- Pre-Trained on ImageNet (ILSVRC-2012-CLS)

Training

Time Allocation

Task	Time	Person
Data Prep	20 min	Oliver
Model and Training	60 min	Oliver & Kathe
Presentation	5 min (boring)	Kathe
